

COMPLETE SIGNAGE SOLUTIONS

AN ACTIVE MEMBER OF

The Company

Sign Works is a company who specializes in producing state-of-the-art sign solutions for a diverse range of commercial advertising clientele.

Our Goals

Sign Works utilizes the very best know-how and cutting edge technology to ensure that it remains up-to-date and innovative to maintain its international standard.

We emphasize the use of premium grade materials and craftspeople, who have decades of experience, in producing the finest quality work exclusively for our customers.

Today we continue to remain at the forefront of the sign industry in the region and strive to live up to our reputation as a world class sign manufacturer.

We believe that customers demand not only a high level of product quality and services, but also signage that enhances their corporate brand and business image.

Our company has more than 300 skillful craft persons equipped with modern and sophisticated equipment that enable us to produce the finest quality products.

For over decades, we have been serving customers both regionally and internationally, and we are confident that we can meet your signage needs with a competitive price, rapid delivery, and consistent quality.

Award Winning

As a proved of our international standard and success, Sign Works-Co., Ltd. was the first-place winner in the 2010 ISA Sign Design Competition (USA) in the Entertainment Venue category.

The Hard Rock Cafe Guitar

Is a 46 feet tall (Not including the-base) and 15.8 feet wide with the total weight of almost 10,000 lbs., standing on a busystreet in Phuket where thousands of pedestrians would walk right under it every day!

The challenge starts from converting the conceptual design (By Graphic 46 Limited) into a reality. Sign Works' engineers has put a considerable amount of effort into design the extremely large guitar with four main keys in mind: Manufacturability, Movability, Maintainability, and Safety. This project took a production team of nearly 150 men and 3 engineers for more than 3 months to complete.

The end result is a structurally sound signage with internal hidden maintenance access and decades of expected operational life. Without any record of injuries from manufacturing, transportation, installation and usage, we can proudly say that the Hard Rock Cafe project is another successful project for us.

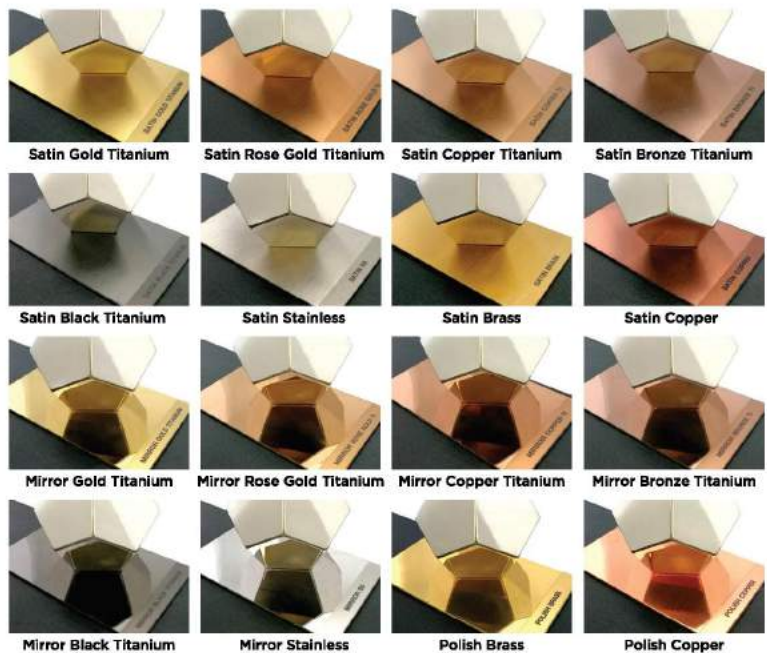

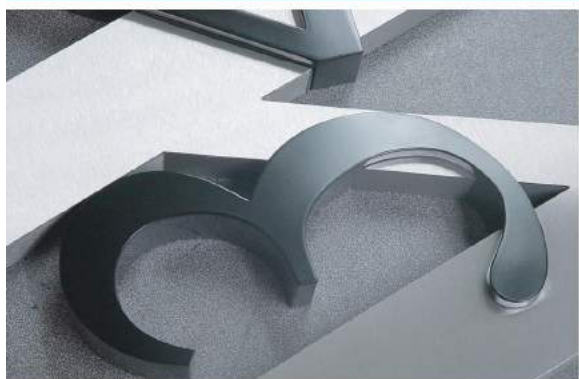

Metallet

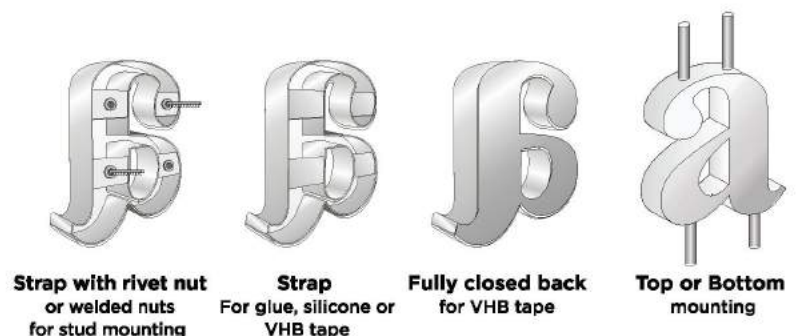

Metallet is one of our brand products. For more than ten years, **Metallet** has been produced in Thailand and over two millions letters were sold to more than 35 countries around the world. **Metallet** is tailored made to fit any design: shape, size and style. Prestige and endurance, **Metallet** signifies luxurious image for your corporate identity. It is produced from the finest selection of stainless steel available. It has proven to be extremely durable which can withstand the test of time and will always stay bright and shine through years.

We have decades old experience production team who combine state of the art machinery along with our own unique production techniques ensuring the finest and consistent quality signage. We are so confident with **Metallet** that we offer you a limited life time warranty!

Materials

Mounting details

Constraction details

Decorative Items

Decorative Items are designed for the unique appearance or the specific purpose can be completed with our experienced team. It is always a challenge for us to combine the variety of materials, and to bring customer's idea into reality.

Custom 3D Fabrication

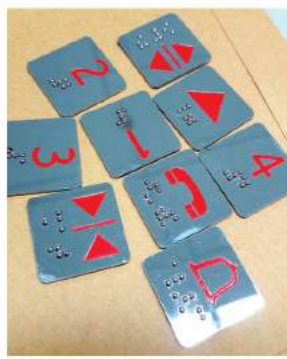

Custom 3D fabrication is an alternative to make your organization log look more prestige and outstanding. It is a top-notch process of the channel letter fabrication. With our professional team and the advanced technology, we can help you create the prismatic look of your corporate logo from scratch to the finish product.

Braille

Our braille sign is conformed with ADA regulation. It could be customized to match with the style and environment. Braille raster are available in stainless steel, brass, and acrylic (black & white).

Chemical Etching

Etching is the process to use acid to create a design in the metal surface permanently.

Thermal Forming

Thermal vacuum forming is the process of making 3 dimension parts from flat plastic sheet by pressing a plastic sheet into a mold after heating and softening the sheet. This technique makes your sign really stand out from a typical single dimension. It is also a good option for illuminated sign which can increase the strength of the sign face. Thermal vacuum forming is proven to be cost effective for a mass production.

Lighting Systems

When it comes to illuminated signage for your business, we offer customer with various systems such as Neon and LED to guarantee that our customer will get a perfect light for their signage.

Fiber glass / Rasin / GRC

Casting is suitable for a small piece of work with complex details which is difficult to be achieved by using other method. It could be made in many shapes and sizes to transform ordinary signage into a piece of art.
