Sustainability booklet
Consumers all over the world are becoming increasingly health conscious and are more than ever concerned about the quality of their food supply. “Sustainable food aims to avoid damaging or wasting natural resources. It also minimises its contribution to climate change throughout the whole production process.”

UAL continue to strive to provide the best sustainable food possible, both from field to fork, as well as the environment staff and students work and eat in.

This booklet hopefully shows you some of the information and stories behind the food you eat.

‘Alastair Johns’
Head of Retail and Catering

BaxterStorey is the soul behind our food and drinks offer at UAL, made possible thanks to the expertise of the teams who are committed to providing you the best customer service across all of our canteens and cafes at all of six colleges.

BaxterStorey are committed to buy more produce from local suppliers and using only the freshest ingredients. Since 2015 BaxterStorey has been proud to be a key partner of the Protein Challenge 2040 with Forum for the Future and the WWF.

As we move to a population of 9 billion on the planet the volume of meat we eat is not sustainable from an environmental, economic or social perspective. Our vision is to create a food culture that is focused on using less animal protein and more plant-based protein.

Who are BaxterStorey?
Ethical food

We buy fresh, local, seasonal produce not just because we believe it tastes better, but because it has a big environmental impact.

Sourcing fresh ingredients local to our kitchens reduces our food mileage and has huge social benefits supporting local suppliers and businesses.

We care about serving our students and staff at UAL sustainable provenance with ethical welfare standards, that’s why we are proud to be part of food accreditation schemes such as:

1. Our food complies with national standards on food and nutrition
2. Our food is healthy, ethical and uses lots of local ingredients
3. Our food has a minimum of 15% organic and 5% of free range ingredients
4. Our food is animal and climate friendly
Vegan soup

Our soups are always vegan. They come in two different size cup with a piece of bread or seasoned croutons.

Vegan croissant

Vegan pastries and cakes are offered as alternative at most of our cafes.

Vegan offer

70% of our food offer is either vegetarian or vegan. Part of our daily offer at the canteen includes hot food, Grab and Go meals (baguettes, wraps, panini, salads...)

Vegan drinks

Alternative vegan drinks: soya and oat are offered with our coffees, both free of charge.
Our strategic aim

UAL will create a culture of social and environmental awareness in order to develop and integrate sustainable and ethical practices throughout all aspects of our life and work. This is captured in our Environmental Policy, our Environmental Management System and our Carbon Management Plan.

Food policy

Sustainability Food Policy (2022/2023)
The Sustainable Food policy is owned by the University of the Arts London and developed by the Accommodation, Retail & Catering Department team (Estates Department). It is reviewed and approved on an annual basis by the Climate and Environment Action Group and covers all cafes and food outlets managed by the Catering Department.

In 2019, following a competitive tender process the University appointed BaxterStorey as its agent to manage and administer the services set out in the contract.

[Link to Sustainability Food Policy (2022/2023)] arts.ac.uk/about-ual/sustainability-at-ual/sustainability-documentation/
This policy outlines our commitment to playing our part in making the world a more sustainable and equitable place.

**The university will:**

+ Provide a choice of food options, including healthy and sustainable food to our students, staff and visitors.

+ Promote the benefits of healthy/sustainable eating by the Food for Life campaign including the provision of seasonal produce.

+ Support local economies and sustainable livelihoods both in the UK and in the case of imported products, in the producer products.

+ Continue to look for new initiatives to reduce our carbon footprint.

+ Encourage our suppliers and contractors to minimise negative environmental and social effects associated with the products and services they provide.

+ To maintain Gold Food for Life Served Here by the Soil Association.

+ Embrace MSC chain of custody training within our teams.

+ Reduce the amount of meat, dairy products and eggs and to promote meals rich in vegetables, wholegrain and pulses.

+ To reduce the amount of bottled water sold by providing fresh tap water in the cafes and providing free access to drinking water across the University to be located in each café.

+ Reduce food waste by ensuring our catering provider is limited to wasting no more than 2% of food serves to staff and students.

+ Reduce the amount of artificial additives.

+ To reduce the amounts of land fill through management of packaging and disposables used within UAL. The catering service will divert food waste to an anaerobic
digester provided by the University’s waste and recycling partner, Suez

+ Communicate to customers “food miles” wherever possible by using information via QR coding

+ To gain “The Green Kitchen” Accreditation for the year 2021-2022

+ Continue to provide space for the “Green Roof Society” who use the space as an urban garden, including to grow food

+ To develop specific Key Performance Indictors to measure progress to deliver continual improvement (see below)

We will achieve this by:

+ Reduce food waste per student/staff annually by controlling food portions and stock ranges

+ Use only coffee suppliers with a commitment to social and financial sustainability for the farmers

+ Increase the purchase of seasonal fruit and vegetables on an annual basis

+ Source fruit and vegetables from the UK in the first instance, followed by importing only via shipping if required. No air freight will be used

+ Reduce the amount of meat consumed annually

+ Use of organic eggs

+ Only serve mains water for internal hospitality meetings as standard

+ Offer mains water via hygienic dispensers to refill water bottles in all canteens

+ Only using organic milk
Exclude fish species identified as most at risk by the Marine Conversation Society (MCS)

Use produce from “Dayboat” suppliers wherever possible

Reducing the amount of disposables by offering a discount to customers using their own vessels

Ensure all disposables are suitable for appropriate waste collection

Using fresh, local and seasonal produce. Whenever we are unable to do so, we commit to buy goods that arrive in the UK by sea or rail, as more environmentally friendly option to air travel

Ensuring all main meals are freshly prepared on site wherever possible

We will recognise this by setting the following targets. By July 2022 we will:

- Maintain Gold “Food for Life” accreditation warded to UAL by the Soil Association
- Reducing disposable usage by 5% year on year
- Only sell bottled water which uses a minimum of 50% recycled plastic
- Reducing meat consumption by 5% year on year
- Source fresh meat from the UK
- All future contracts include a clause to the contract caterer, ensuring they maintain the Gold standard and accept inspection from the Soil Association as part of the contracted terms
Food certifications

‘Gold food for life being served here’ award

Soil Association is the charity that digs deeper to transform the way we eat, farm and care for our natural world.

‘The Food for Life Served Here’ award

Is an independent endorsement, backed by annual inspections, for food providers who are taking steps to improve the food they serve.

UAL is the first university in the UK to receive the Gold Food for Life Served Here award by the Soil Association across all canteen outlets at all six of its colleges for the past 6 years.

This award means that:

+ Food is served fresh
+ Food is responsibly sourced
+ Healthy eating is made easy
+ Local food producers are supported
Soil Organic Association
Formed in 1946
The only UK charity working across the spectrum of human health, the environment and animal welfare. Through their campaigns, educating programmes they help everyone understand and explore the vital relationship between the health of soil, plants, animals and people

soilassociation.org/

Assured Food Standards
Founded in 2000
The Red Tractor is a world-leading food chain and its label is only found on British food and drink products that have been certified to rigorous standards from farms to pack. This means the food we buy has been responsibly sourced and safely produce

redtractor.org.uk/

RSPCA assured
Founded in 1984
It is the food label dedicated to animal welfare. The scheme covers both indoor and outdoor rearing systems and ensures that all animals are reared, transported and slaughtered and have everything required for a better quality of life

rspcaassured.org.uk/

Certified sustainable seafood
Founded in 1996
It is an independent non-profit organization which sets a standard for sustainable fishing. Fish and seafood with the blue label come from a fishery that has been independently assessed on its impacts on wild fish populations and the ecosystems they’re part of

msc.org/uk
We use fresh, locally sourced products to deliver high-quality food. We source our produce as locally and seasonally as possible for many reasons:

**Quality**
Fresh and seasonal with less artificial input

**Social and ethical**
Supporting and encouraging local employment, enhancing food security for the UK and less import

**Environmental impact**
Less packaging, seasonality and sustainable farming

**Economic impact**
Local employment, UK farming and seasonal food thus reducing the cost

**Food map**

- Our beef and chicken from Purfleet, Essex
- Our potatoes from Lincolnshire
- Our coffee supplier from Bristol
- Our cheese from Ditcheat
- Our eggs from Guildford, Surrey
- Our milk from Surrey
All of our milk is organic

‘West Horsley Dairy’
Surrey, UK

Organic and free range eggs

All of our eggs are locally sourced, lion stamped and RSPCA farm assured

‘Chapel farm’
Guildford, Surrey (UK)
At Dyson farming technology and innovation enable farmers to boost productivity, increase efficiency and use fewer chemicals.

**Finest potatoes**

‘Dyson farming’
Lincolnshire (UK)

**Organic beef, free range chicken**

‘William White’
Purfleet, Essex (UK)

William White combines the skill and passion of traditional butchery with innovative and precise manufacturing methods, providing exceptional quality products.
Alaska pollock are schooling, midwater to bottom-dwelling fish, usually found between 100m to 300m in depth.

Barber’s 1833 is the oldest surviving cheddar-makers in the world at his Somerset farm.
Direct Impact coffee

‘Extract Coffee Roasters’ (UK)

UAL’s house espresso, Cast Iron, is from a Rainforest Alliance certified estate in Guatemala, San Marcos, roasted on Betty, a 1950s Vintage Probat roaster

Extract Coffee Roasters are artisan roasters with one simple mission, Make Coffee Better. Better for growers, better for communities, and better for you

They believe in Direct Impact coffee. In practice this means building long-term relationships with farmers they trust and buy from year after year. They pay quality based premiums and share knowledge with farmers to help them improve coffee quality and long-term earning potential

In 2020 during lockdown, Extract Coffee Roasters donated more than 35,000 cups of coffee to the NHS
projects have included experimental lots and varietals and sharing knowledge with farmers big and small

Their closest relationships are with farmers in Colombia, Peru, (South America), El Salvador (Central America) Guatemala, Honduras and India

As part of their ethos, Make Coffee Better. They want to make coffee better for our communities. Grounds Up is a collective of grass-roots charity partners and projects within the Extract Coffee Roasters community. They help to support these organisations all-year-round through volunteering, mentorship and fundraising. Every coffee we serve supports these projects. By buying and drinking coffee roasted by Extract, you’re supporting them too!
Coffee certifications

Rainforest alliance
Founded in 1987
The rainforest alliance seal promotes collective action for people and nature. It amplifies and reinforces the beneficial impacts of responsible choices, from farms and forests all the way to the supermarket check-out. The seal allows you to recognize and choose products that support the society, economy, and environment.

rainforest-alliance.org/

Extract Coffee’s Production Manager Sean roasting on Betty, a 1950s vintage Probat roaster lovingly hand-restored by Extract.
BaxterStorey’s sustainability journey really began in 2006 when we gained ISO 14001 accreditation for our environmental management system. Our drive and commitment have never wavered to the point where we have most recently made our net zero commitments by signing the Business Ambition for 1.5°C pledge and joining the Race to Zero.

Our ongoing relationship with UAL is brilliant, it is a true partnership with aligned sustainability aspirations that enables us to provide the staff and students at UAL with an unrivalled sustainable catering service.

‘Mike Hanson’
Director of sustainable business across WSH

---

**I Did**

- We recycle our used cooking oil into biodiesel. Every litre saves 2kgs of CO2e - the equivalent to charging your phone 255 times.
- In 2019 we removed over 1.8 million pieces of single use plastic from our supply chain.
- Our move away from sauce sachets will save 6 million sachets a year, that’s 9 tonnes of plastic.

**I Know**

- Our counters at Wilson Road, CSM, and Typo cafe are made from recycled yoghurt pots.

---
Since 2014, zero waste has gone to landfill.

100% of our kitchen food waste goes to an anaerobic digester (and turned into renewable energy managed by Suez).

Suez, UK
Olleco are the UK’s leading refiner of used cooking oil, and they use it to create biodiesel of the very highest standard.

Since 1st Jan 2021 we have recycled 2,464 litres of cooking oil into biodiesel managed by Ollecco. That has saved 5,251 Kg CO₂e.

This is the same as the amount of carbon sequestered by 234 trees in a year or the emissions from 1.4 cars off the road for a year.

Olleco’s biodiesel is ISCC (International Sustainability and Carbon Certification) compliant and exceeds the specification required for it to be used as the proportion legally required to be blended into diesel fuel sold in the garage forecourts of UK and EU countries. This has the effect of reducing carbon emissions by 88% compared to fossil diesel.

Olleco, UK

olleco.co.uk
We sell vegan Lemon-aid+ and ChariTea soft drinks which are 100% organic and Fairtrade certified. Once a customer has used the drink, they can take the bottle at home and re-use as washing up liquid, shampoo, hand wash, etc...

Toppers are sold on the official website.

Our teams re-use the bottles as condiment for salt, pepper and dressing oil. Spot them around the canteens!
Napkin

Our napkins are compostable (EN13432) and made of 100% recycled fibres. 75% sugarcane packaging, unbleached and FSC certified.

Sustainably sourced straws

Our paper straws are made from sustainably sourced paper and use natural inks and glues.

Bio takeaway boxes

Our takeaway bio boxes are made from 100% recycled materials like paper and cardboard. Also they are biodegradable, recyclable and compostable.

50% recycled plastic

Our water bottles are made from a minimum of 50% recycled plastic.
China mugs and plates

We provide china mugs and plates, and metal cutlery as sustainable alternatives to takeaway packaging and we love it when customers choose to eat in.

Loyalty cards

We love to reward our customers with a free coffee or meal when they use sustainable alternatives to eat/drink in. Our loyalty cards are available at any till points.

Sustainable cup

We have a brand-new UAL keep cup available in 5 different colours, handwash and dishwasher safe.

Wooden cutlery

We have said ‘Goodbye’ to plastic cutlery and given them a sustainable upgrade!

Despite we encourage to use metal cutlery, our takeaway cutlery is made from sustainable forest wood.
Recycled counters

Part of the counters of the cafes and cantees across all of six colleges are made from a combination of reclaimed wood and FSC wood.

FSC Wood
Founded in 1993, it stands for ‘Forest Stewardship Council’. This is an international non-profit organisation dedicated to promoting responsible forestry. FSC certifies forests all over the world to ensure they meet the highest environmental and social standards.
